Kingsbury General Improvement District ("KGID" or "District") is hereby requested to furnish the applicant water and/or sewer service and facilities as detailed herein, and as may be ordered from time to time, either verbally or in writing. It is understood that this application is made for service subject to the rates, charges, rules and regulations, subject also to such modifications of same as may, from time to time, become legally effective. KGID is hereby granted access to the premises upon which service is to be installed for the purpose of inspecting, repairing or removing same. **BASE MONTHLY SERVICE CHARGES BEGIN SIX MONTHS AFTER THE ISSUE DATE OF THIS PERMIT. WATER CONSUMPTION CHARGES BEGIN IMMEDIATELY. IT IS THE OWNERS' RESPONSIBILITY TO ENSURE THAT ITS CONTRACTORS ARE AWARE OF ALL TERMS AND CONDITIONS OF THIS PERMIT.**

Terms of Permit:

1. Permit fees will be refundable upon request until the earlier of a) the expiration on one year from the permit issue date, or b) the securing of a building permit.
 2. Permit fees will be refundable if within three years of the permit issue date the right to build is denied by a governmental agency.
 3. This permit is not transferable.
 4. This permit will remain valid at the issue price as long as the associated building permit is obtained within one year and is kept valid.
 5. If this permit becomes invalid, another permit must be obtained at the then current rate, but credit will be given for previous permit fees paid to KGID on the property. The burden of proof that previous fees have been paid rests with the property owner.
 6. An inspection guarantee deposit is required at the time this permit is purchased. The calculation of deposit is \$1.00 per square foot of total structure, to a maximum of \$5,000.00. The deposit will be refunded after KGID personnel have completed all required inspections. **Deposit will be forfeited if all required inspections are not performed and completed by KGID. The inspections required in this paragraph must be performed and completed by KGID only. KGID shall not sign off on grant any permit if the inspections required under this paragraph are performed by an outside vendor or contractor.** Initial _____
- If checked A \$1,000 bond is to be posted for any encroachment on District streets. The bond fee will be returned to applicant upon satisfactory pavement repairs as determined by a District representative. If repairs are made by the District, any difference will be refunded to the applicant.

KGID Construction Policies and Procedures

Plan Review: KGID staff conducts a review of building plans prior to issuing a Connection Permit. In the review, the following things are determined. First, a fixture count is done to calculate, according to the current Uniform Plumbing Code, the correct size lateral and water meter for the building. Also, KGID uses the plans to identify if a backflow prevention device is needed, and if so what type. Lastly, the type of sewer is checked, whether it is a gravity sewer or it will require a lift station.

Water Service: All water lines must be constructed in accordance with the UPC. In addition, as per KGID Water Ordinance 4.6 the water service must be brought into compliance with the determined size, based on the building plans. If the existing water service is of insufficient size, it must be upgraded.

All new construction requires a properly sized water meter that meets KGID's specifications. The meter must be installed in an approved meter set or pit, and any meter reading device must be positioned according to KGID requirements.

Each building must be equipped with at least one valve for the owner's use to shut off the water to the building.

Sewer Service: All sewer lines must be constructed in accordance with the UPC. In addition, as per KGID Sewer Ordinance 4.06 the sewer service must be brought into compliance with UPC. Any necessary changes to the existing line to do so are the responsibility of the owner. These may include adding needed cleanouts, replacing pipe, or any other modifications.

Inspections: The owner or designated person is responsible for calling for the needed inspections. There are two different kinds, a partial and a final. Partial inspections are needed whenever new lines, water or sewer, are laid, but not buried. This includes rough plumbing inspections. The sewer lines need to be pressure tested in accordance with UPC, and the water lines must be pressure tested. There can be more than one partial inspection. The final inspection includes checking all meter equipment (meter pit, remote reader mounting), backfill of all lines, making sure cleanout boxes are to grade and that the cleanouts are equipped with caps or plugs. After the final inspection, the Inspection Deposit will be returned.

I have read and agree to all of the above: _____

KGID Water Meter Specifications

Meter Installation:

All water meters to be installed shall be of a type, size, and brand approved by the District.

The meter shall be compatible with the District's current meter reading system.

The meter shall be installed in a manner approved by the District, either in a Mueller meter setter pit, or in a properly constructed meter pit or vault, with a metal lid, and with all necessary valves.

Transmitters for meter reading must be mounted in the lid of the pit, or as approved by the District Inspector.

Current list of acceptable meters:

$\frac{3}{4}$ " to 1 $\frac{1}{2}$ " meters:

1. Badger M-series equipped with the Orion Radio Reading system
2. Badger E-series equipped with the Orion Radio Reading system (fire systems)

2" to 4" meters:

1. Badger Recordall Compound series meter equipped with the Orion Radio Reading System.

Larger than 4" meters, or smaller high flow applications: Contact KGID for specific meter needs.

For any questions about meters, selection or installation, please contact:
